

Dermaporin Advanced Healing + Microbial Barrier Ointment

Mechanism of Action

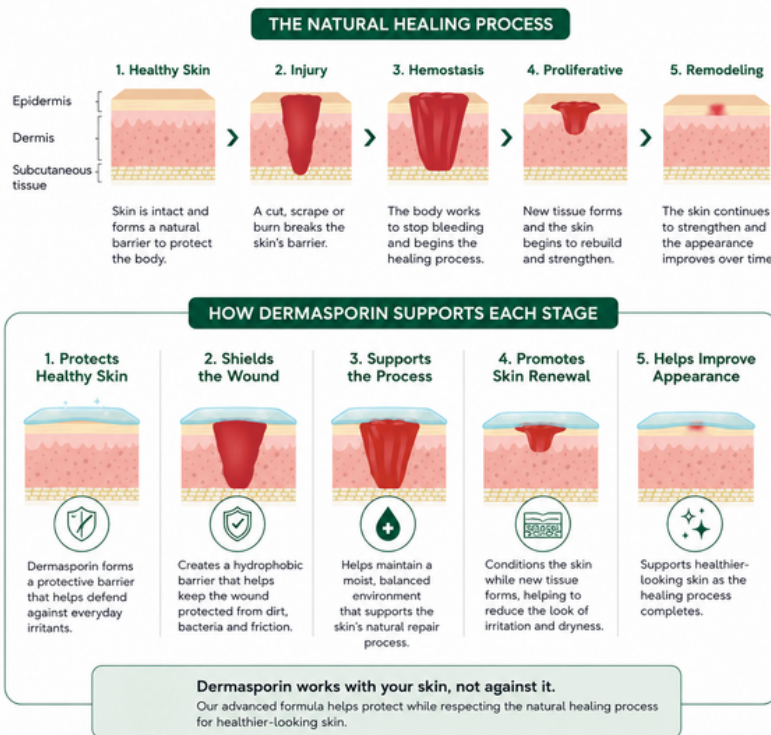

Unlike antibiotic-based ointments that rely on synthetic chemicals to fight infection, Dermaporin works through a dual-action approach – combining advanced physical barrier protection with the restorative power of botanical healing agents. Upon application, its patented HydroilShield Technology, powered by Lanolin (27.98%), immediately forms a hydrophobic occlusive barrier over the wound surface, locking in the skin's natural moisture, blocking bacteria and environmental contaminants, and providing continuous 24-hour protection that lasts 7x longer than petroleum-based leading brands. Simultaneously, its proprietary Botanical Healing Complex – featuring Calendula Officinalis to promote tissue regeneration, Symphytum Officinale to stimulate cell proliferation, Goldenseal Root Extract and Tea Tree Oil for natural antimicrobial support, and Aloe Vera to soothe and reduce inflammation – works within the skin tissue to accelerate the body's natural repair process. As healing progresses, a nourishing base of Shea Butter, Coconut Butter, Jojoba Oil, and Vitamin E Oil restores the skin's lipid barrier, minimizes scarring, and returns skin to its healthy state – all without the use of neomycin, petroleum, or harsh synthetic antibiotics, making it safe for sensitive skin and suitable for everyday use.

HydroilShield Technology

Dermaporin's patented HydroilShield Technology, powered by Lanolin (27.98%), acts as a powerful skin protectant by immediately forming a hydrophobic, occlusive barrier over the wound upon application, preventing moisture loss and blocking environmental contaminants, bacteria, and irritants from entering the wound site, while creating a protective seal that lasts up to 24 hours – delivering 7x longer lasting barrier protection compared to petroleum-based leading brands.

Microbiology

Dermaporin's botanical complex provides antimicrobial support against common wound-infecting organisms including Staphylococcus aureus and streptococcal species, without the use of neomycin or petroleum-based carriers, making it a safer and gentler alternative for long-term wound care, especially for individuals with sensitive skin or antibiotic sensitivities, without compromising healing efficacy.

Why Dermaporin Is Different

Selective Microbial Action

Kills harmful bacteria while preserving the good bacteria needed for accelerated healing – designed to heal, not simply sterilize.

Semi-Permeable Barrier Technology

HydroilShield Technology keeps moisture in while its targeted botanical antimicrobials control bacteria without disrupting the skin's natural microbiome – unlike petroleum-based ointments that trap moisture and slow oxygen flow to the wound.

Botanical-Enhanced Formula

Enriched with Aloe Vera, Calendula Officinalis, Symphytum Officinale (Comfrey), and Sea Buckthorn to condition, soothe, and actively support skin regeneration at the cellular level – going beyond surface-level protection.

Neomycin & Petroleum Free

Formulated entirely without neomycin or petroleum-based carriers, making Dermaporin a cleaner, safer alternative for individuals with sensitivities, children, and those seeking a more natural approach to everyday wound care.

Proven Track Record

Born from battlefield medicine and refined through decades of clinician-led R&D on thousands of real-world patients – validated where it matters most.

Dermasporin Advanced Healing + Microbial Barrier Ointment

Easy to Use

1. Allergy test first

- Before full application, apply a small amount of Dermasporin to the inside of your forearm. Wait 15-20 minutes and check for any redness, itching, or irritation before proceeding.

2. Clean & dry the wound

- Gently wash the affected area with mild soap and clean water to remove dirt and debris. Pat the skin thoroughly dry with a clean cloth or sterile gauze before applying the ointment.

3. Apply & cover — first 2 days

- Apply Dermasporin directly to the affected area 5-6 times daily for the first two days. Cover well with a sterile gauze bandage after each application to protect the wound and keep the HydroilShield barrier intact.

4. Reduce frequency as skin heals

- From day 3 onward, reduce application to 2-3 times daily and continue until the skin is fully healed. Reapply after bathing or whenever the bandage is changed.

Days 1-2

5 - 6x

applications per day

Days 3 onwards

2 - 3x

applications per day

Product Information

Active Ingredients.....Purpose
Lanolin, 27.98% Skin Protectant

Uses

Helps temporarily protect minor cuts, scrapes, and burns.

Warnings

For external use only.

Do not use

- On deep or puncture wounds • On animal bites • On serious burns

When using this product

- Do not get into eyes.

Stop use and ask a doctor if

- Condition worsens • Symptoms last for more than seven (7) days or clear up and occur within a few days

Keep out of reach of children

- If swallowed, get medical help or contact a Poison Control Center right away.

Directions

- Clean and dry the affected area.
- Apply as needed.
- May be covered with a sterile bandage.

Inactive Ingredients

Aloe Barbadensis Leaf Juice, Butyrospermum Parkii (Shea) Butter, Calendula Officinalis (Marigold) Flower Oil, Cera Alba (Beeswax), Cocos Nucifera (Coconut) Butter, Echinacea Purpurea Extract, Emulsifying Wax NF, Ethacridine Lactate Monohydrate (preservative), Hippophae Rhamnoides (Sea Buckthorn) Extract, Hydrastis Canadensis (Goldenseal) Root Extract, Hypericum Perforatum (St. John's Wort) Flower Extract, Juniperus Communis Fruit Oil, Lavandula Angustifolia (Lavender) Oil, Melaleuca Alternifolia (Tea Tree) Leaf Oil, Myristica Fragrans (Nutmeg) Kernel Oil, Oleum Morrhuae (Cod) Liver Oil, Simmondsia Chinensis (Jojoba) Seed Oil, Squalene, Symphytum Officinale (Comfrey) Extract, Syzygium Aromaticum (Clove) Oil, Tocopheryl Acetate, Zinc Oxide.
