

Poison Ivy/Oak Soap

The Condition

The sparkling blue skies and gentle breeze beckon us to the outdoors. Whether this calls for long treks in the forest, gardening in your backyard, or camping, there is always what to do under the sun. Yet, as you enjoy the calming outdoors, beware that poison ivy, poison oak, and poison sumac can be lurking close by. These three pesky plants all contain urushiol, the skin-irritating oil that causes itchy rashes. Common signs of exposure to poison ivy, oak, and sumac generally include redness, itching, painful swelling, oozing and blistering of the skin.

Our Treatment

Marie Originals Poison Ivy/ Oak Relief Soap is a natural remedy to provide instant relief from poison ivy, oak, and sumac. This soap removes urushiol oil, the skin-irritating oil that cause itchy, blistering rashes. The soap is a therapeutic medley of powerful herbs including white willow and sassafras, to soothe the rash, and relieve the itch. Containing the perfect ratio of noni and a dose of bentonite clay for its detoxifying properties, the soap effectively removes the irritating toxins that causes the itch.

TIPS FOR POISON IVY, OAK, AND SUMAC

Know these plants. Look out!

LOOK OUT! Poison ivy and oak are found in bunches of three leaves, while poison sumac grows in a cluster of 5-13 leaflets with a bright red stem. Poison ivy and oak can either grow as a single plant, ropey vine, or a shrub. In contrast, poison sumac always grows as a bush or tree.

Beware of indirect exposure

These plants can find sly ways to nip you (i.e. clothing or gardening gloves that have come in contact with urushiol). After use, place the item exposed to poison ivy in a laundry machine with detergent, washing separately from other clothes. Handle carefully to avoid direct contact with your skin.

For an unplanned encounter

If your skin has been exposed to these plants, take a cool or lukewarm shower, rinsing the areas that have been exposed to urushiol. Do not take a hot shower, as this will open the pores and allow further penetration of urushiol into your skin.

Marie
Originals®

Targeted, lasting relief that's safe and gentle enough for even sensitive skin. And powerful potent and certain to get the job done - fast. Marie Originals, a powerhouse hybrid of raw power and raw nature.

Poison Ivy/Oak Soap

Easy to use

- 1) Wet skin with **cool** water.
- 2) **Gently** exfoliate the affected areas with the coarse side (top) of the soap bar.
**Those with extra-sensitive or dry skin should skip step 2*
- 3) Using the smooth side (bottom) of the soap bar, create a thick lather and rub into skin.
- 4) Let lather sit on skin for at least five minutes, then rinse thoroughly, but gently, for long lasting relief.
